Control Mountings

Fixed front mount

The fixed front mount is the standard control mount for Quickie hand controls.

Swing-away front mount

Unlike the fixed front mount this swing-away mount offers clients horizontal adjustment of the hand control allowing them to swing it away and adjust it to their preference.

Backrest Recline Options

Back angle adjustable with Tools

The standard rehab manual adjustable back provides a fixed back angle from 0° to 30°. Adjustment is still quick and easy. Simply remove the fixing bolts, set the desired angle and refit the bolts.

Manual recline – gas spring system Only available for Rumba Modula

If your client requires a back that can be reclined whilst in the chair, then the gas spring system is for them.

With the client seated in their Rumba, carers can recline this back from 0° to 30° with the press of a lever.

With stabilization bar, with Push handlers

Power recline Only available for Rumba Modula

Ideally suited for clients who want to adjust the back angle with no assistance from a carer.

Powered from the hand control, the back can be reclined from 0° to 30°.

With stabilization bar, with Push handlers

Armrest

Std Armrest (height Adjustable)

(+ 3cm width adj. each side)
